

KEYWORD INDEX

- ²¹⁰Pb, 173
- ²³⁴U/²³⁸U in seawater, 279
- ²³⁹⁺²⁴⁰Pu, 173

- agro-ecosystem, 375
- amino acid(s), 95, 109
- AMS, 279
- Antarctic Bottom Water, 45
- AO/NAO, 205
- artificial radionuclides, 147
- AVHRR, 411

- behavior, 147
- benthic foraminifera, 249
- biodiversity, 359
- biogenic opal, 95
- biogeochemical cycle, 189
- biogeography, 121
- biomass burning, 411

- cadmium, 189
- calcification, 229
- canopy photosynthesis, 453
- carbon, 311
- carbon cycle, 229, 343, 441
- carbon dioxide, 229
- carbon isotopes, 249
- carbonate, 95, 133
- CASI, 425
- Cd/Ca, 249
- cereal demand, 391
- cereal supply per capita, 391
- cereal yield, 391
- chlorophyll and nitrogen, 453
- Circumpolar Deep Water, 45
- climate change, 265, 391
- CO₂ diffusion resistance, 453
- CO₂ fertilization effect, 473
- CO₂ flux, 473
- coccolith, 121, 133
- coccolithophore(s), 121, 133
- conifer, 425
- continental margin, 173
- coral paleoclimatology, 205
- coral records, 147
- coral reefs, 229
- coupled physical and biological model, 1

- $\delta^{18}\text{O}$, 205

- database, 411
- data set, 441
- deglaciation, 265
- dynamic simulation, 375

- East and South Asia, 391
- East China Sea, 173
- eddy covariance method, 375
- El Niño/Southern Oscillation (ENSO), 265
- ENSO, 205
- ENSO cycle (El Niño/Southern Oscillation), 95
- equatorial Pacific, 59, 95
- Equatorial Pacific Ocean, 109, 121
- export flux, 1

- FAPAR, 411
- floating weeds, 473
- flux, 133
- forest, 311
- forest fires, 411

- global ocean carbon cycle, 1
- grassland, 311
- greenhouse gas, 265

- heinrich event, 279
- hexosamines, 109

- ice age, 279
- input, 147
- interannual variability, 205

- Kyoto Protocol, 311

- La Niña, 109
- lagoon, 229
- LAI, 411
- land cover change, 359
- land use, 311, 359
- lateral transport process, 173
- long-term ENSO, 265

- mechanistic model, 343
- metabolism, 229
- Mg/Ca, 249
- microbial food web, 1
- microhabitat, 249
- MODIS, 441

- NEP, 311
 net community production, 59
 net ecosystem production, 375
 net ecosystem productivity (NEP), 401
 net primary production, 1, 343
 net primary productivity (NPP), 391
 North Atlantic Deep Water, 45
 NPP, 311, 401, 411
 NPP of cropland, 391
- ocean general circulation model, 45
 ocean ventilation, 45
 organic carbon, 95
 oxygen utilization, 249
- Pacific, 133
 Pacific Deep Water, 45
 paddy weed community, 473
 partial pressure of CO₂, 59
 particle flux, 109
 particulate carbonate, 59
 phosphate, 189
 photoinhibition, 453
 photosynthesis, 229
 photosynthetically active radiation, 343
 planktonic algae, 473
 preformed concentration, 189
 process model, 375
Prosopis glandulosa, 359
- radiative transfer model, 375
 radiocarbon, 45, 279
 remote sensing, 425
 rice FACE, 473
- sea-level, 279
 sea-to-air CO₂ flux, 59
 sediment trap, 95, 109, 133
 sediment trap experiment, 173
 settling particles, 95
 socio-economical impact, 391
 soil, 311
 soil carbon, 359
 soil heterotrophic respiration, 401
 soil nitrogen, 359
 Sr/Ca, 205
 stem volume, 425
 SVAT model, 375
 synergy, 375
- temporal change, 147
 terrestrial ecosystems, 343
 the Western Pacific, 189
 thermohaline circulation, 45
 TIMS, 279
 total inorganic carbon, 59
 tree height, 425
 tropical Pacific, 265
- uranium series dating, 279
- vegetation index, 375
- weather records, 411
 woody plant encroachment, 359
 World Ocean Circulation Experiment (WOCE),
 45
- WPWP, 95
- year-to-year variation, 453
