

# CONTENTS

Preface .....	I. Sunagawa	v
Morphology and Growth Unit of Crystals: An Introduction .....	I. Sunagawa	xiii
CHAPTER 1: EQUILIBRIUM FORM		
Monte Carlo Studies of Equilibrium Crystal Shapes.....	Y. SAITO and M. UCHIYAMA	3
Crystal Shapes Viewed as Mechanical Equilibrium of Steps .....	M. UWAHA and P. NOZIÈRES	17
Morphology and Surface Structure of Simple Crystals.....	J. P. VAN DER EERDEN	37
The Growth Characteristics of the III-V Compound-Like Crystals Affected by the Relative Activity .....	A. OOKAWA, N. AKUTSU, and Y. ASAKURA	49
CHAPTER 2: FINE PARTICLES		
An Essentially-Three-Dimensional Quasicrystal .....	T. OGAWA	53
Dynamic Behavior of Small Metallic Particles .....	S. IJIMA	69
On the Growth of a Cubic Octahedral Crystal with Polarity .....	Y. SAITO and C. KAITO	75
Morphology, Internal Defect and Grain Boundary of Ultra Fine GaP Particles .....	C. KAITO, Y. SAITO, and K. FUJITA	85
CHAPTER 3: SURFACE ROUGHENING AND MELTING		
Surface Melting.....	A. A. CHERNOV and V. A. YAKOVLEV	99
Relation between Morphology and Interfacial Roughness in Melt Growth of Ionic Crystals .....	T. SAWADA and T. SHICHIRI	117
CHAPTER 4: STEP PATTERN		
Step Bunching Due to Impurity Adsorption: A New Theory.....	J. P. VAN DER EERDEN and H. MÜLLER-KRUMBHAAR	133
A Numerical Analysis for the Supersaturation Distribution around LPE Macrostep.....	T. NISHINAGA, C. SASAOKA, and A. A. CHERNOV	139

A Method to Reproduce Three-Dimensional Behavior of LPE Macrostep . . . . .	T. NISHINAGA, C. SASAOKA, and M. WASHIYAMA	153
Simulation of the Advance Velocities of Steps of Different Crystallographic Directions on the (110) Face of Yttrium Iron Garnet: Theory and Observations . . . . .	T. A. CHEREPANOVA, G. T. DIDRIHSONS, P. BENNEMA, and K. TSUKAMOTO	163

#### CHAPTER 5: CRYSTAL MORPHOLOGY

Thermal Evolution of Crystal Shapes on $\alpha$ -Ag <sub>2</sub> S . . . . .	T. OHACHI and I. TANIGUCHI	203
Crystallographic Rules to Determine Connected Nets from Crystalgraphs Based on Theories of Roughening: Crystallographic and Physical Implications . . . . .	P. BENNEMA	219
Ab initio Derivation of Crystal Morphology . . . . .	Z. BERKOVITCH-YELLIN, I. WEISSBUCH, and L. LEISEROWITZ	247
Role of a Spiral with Negative Curvature in Growth of a Polyhedral Crystal . . . . .	M. KITAMURA and I. SUNAGAWA	279
Analyses of Striated Faces and Habit Change of Polar Crystals: Application of an Extended PBC Method . . . . .	T. MIYATA, M. KITAMURA, and I. SUNAGAWA	287
Equilibrium and Growth Kinetics of Polar Crystals . . . . .	D. AQUILANO	309

#### CHAPTER 6: MORPHOLOGICAL STABILITY AND PERFECTION

Dendritic Growth of Crystals (Theory) . . . . .	H. MÜLLER-KRUMBHAAR, G. GOLDBECK, and Y. SAITO	315
Morphological Stability during Alloy Solidification . . . . .	S. R. CORIELL and G. B. MCFADDEN	335
Experimental Investigation of Stability of Planar Interface and Development of Cellular Interface during Czochralski Growth of LiNbO <sub>3</sub> Single Crystals Doped with Yttrium . . . . .	N. MING and F. ZHOU	349
Structural Perfection of Melt-Grown Alkali Halide Crystals . . . . .	V. N. EROFEEV	365
Experimental and Theoretical Morphology of Salol Crystals . . . . .	W. JIN, H. KOMATSU, and T. INOUE	375

#### CHAPTER 7: SOLUTION GROWTH; MORPHOLOGY AND GROWTH UNIT

Morphology and Kinetics of Crystal Growth from Aqueous Solutions . . . . .	A. A. CHERNOV	391
A Phenomenological Approach to Determining the Growth Unit in Crystal Growth from Aqueous Solutions . . . . .	T. OGAWA	419

In situ Direct Observation of a Crystal Surface and Its Surroundings  
 ..... K. TSUKAMOTO 451

Mechanism of Crystal Growth from Boiling Water Solutions of Soluble Inorganic Salts, Mainly KDP ..... R. RODRIGUEZ-CLEMENTE, VEINTEMILLAS-VERDAGUER, and F. RULL-PEREZ 479

Solvent Effects on Crystallization of Polymorphic Modifications of Lipids ..... K. SATO 513

Effect of H<sub>2</sub>O upon the Morphology of Diamonds Grown from Nickel at High Temperature and Pressure.....  
 .. H. KANDA, T. OHSAWA, O. FUKUNAGA, and I. SUNAGAWA 531

Morphology of Hydrothermally Grown Fayalite Crystal .....  
 ..... S. HIRANO, Y. IWAI, and S. SOMIYA 543

Macro- and Micro-Morphology of the Single Crystals of Intermetallic Phases of Nb-Sn System .....  
 ..... T. INOUE, M. SHIMIZU, and H. KOMATSU 555

Dissolution Forms of Potassium Chloride Crystal in Aqueous Solution ..... T. NISHIDA 569

CHAPTER 8: SNOW CRYSTALS

Morphology of Ice Crystals Grown from Vapour and Melt Phase  
 ..... T. KURODA 577

A Heuristic Model of Snowflake Morphology and Growth .....  
 ..... C. J. SCHNEER 595

Ventilation and Growth Form of Crystals ..... J. HALLETT 607

The Quantitative Growth Law of Ice Crystals and Its New Model  
 ..... A.-S. WANG 611

Habit of Ice Crystals Grown in Air at a Low Pressure .....  
 ..... T. GONDA and T. SEI 615

Morphology of Ice Crystals Grown in a Slowly Flowing Supercooled Cloud ..... T. OHNO and A. YAMASHITA 627

Initial Stages of Morphological Instability of Vapour Grown Ice Crystals ..... D. NENOW, V. STOYANOVA, and N. GENADIEV 637

Ellipsometric Study of the Quasi-Liquid Layer at the Surface of Ice Crystal .... Y. FURUKAWA, M. YAMAMOTO, and T. KURODA 647

CHAPTER 9: MINERALS

High-Resolution NMR Spectroscopy of Local Structure of Glasses  
 ..... R. J. KIRKPATRICK 653

Nucleation Kinetics of Plagioclase Crystals in Artificial Basaltic Melt  
 ..... K. WATANABE and M. KITAMURA 657

Coincidence Site Conjugation of Cholesterol Monohydrate Crystals  
 ..... H. KOMATSU 671

In-situ Observation of Growth and Dissolution Processes at Elevated Temperatures.....	M. KAWASAKI, T. ABE, H. NAKAMURA, K. TSUKAMOTO, and I. SUNAGAWA	677
Morphological Changes of Forsterite and Diopside Depending on Supercooling and Compositions.....	..... T. ABE, K. TSUKAMOTO, and I. SUNAGAWA	681
Metastable Nucleation in Silicate Systems .....	H. NAKAMURA, T. ABE, K. TSUKAMOTO, and I. SUNAGAWA	687
