

## Contents

Preface, xiii

Professor Masaki Morimoto, 40 Years in Radio Astronomy, A (light-hearted) Tribute, xiv

### **Chapter 1. High Resolution and Better Imaging**

MUSES-B Satellite System for VSOP

H. Hirose, 3

Mechanical Design and Development of a Deployable Space Antenna for Japanese VLBI Space Observatory Program

M. C. Natori, T. Takano, K. Miyoshi, T. Inoue and T. Kitamura, 10

Operation of the VSOP Satellite

Y. Murata, 21

Ground Supporting Facilities for VSOP Observations

N. Kawaguchi, H. Kobayashi, T. Miyaji, H. Mikoshiba, A. Tojo, Z. Yamamoto and H. Hirose, 26

Space VLBI Simulations

D. W. Murphy, V. Yakimov, H. Kobayashi, A. R. Taylor and I. Fejes, 34

Space VLBI Scheduling Studies: Techniques and Results

D. L. Meier, 39

An Affordable Advanced Space VLBI Mission

J. S. Ulvestad, D. L. Meier, D. W. Murphy, R. A. Preston and J. G. Smith, 44

Space VLBI Experiments Using ETS-VI

T. Iwata, H. Kiuchi, M. Imae, M. Sekido and S. Hama, 49

Space VLBI Polarization Observations

D. C. Gabuzda and A. R. Taylor, 54

Space VLBI User Assistance Software

I. Fejes, D. W. Murphy, A. R. Taylor, V. Yakimov and G. Young, 59

mm VLBI

L. B. Bååth, 70

“High Sensitivity” VLBI at 86 GHz: First Fringes with the 100 m Radio Telescope at Effelsberg

K. J. Standke, D. A. Graham, T. P. Krichbaum, A. Witzel, C. J. Schalinski, A. E. E. Rogers, R. Booth, L. B. Bååth, 75

- Burst Mode System toward mJy Level mm-VLBI  
M. Inoue, K. Matsumoto and N. Kawaguchi, 86
- 86 GHz Global VLBI Progress Report  
S. Doleman, A. E. E. Rogers, L. Bååth, C. Schalinski, T. Krichbaum, M. Inoue,  
A. Zensus, S. Padin, J. Carlstrom, D. Graham, C. Predmore, J. Moran,  
D. Backer, M. Wright, N. Whyborn, L. Nyman, K. Standke, M. Lerner  
and S. Kamenno, 89
- Global 3- and 7-mm VLBI Observations of OJ287  
C. E. Tatemura and M. Inoue, 93
- VLBI Observations of the 22 GHz H<sub>2</sub>O Maser in Late Type Stars  
H. Takaba, T. Iwata, M. Miyoshi, N. Ukita, S. Kamenno and K. Matsumoto, 101
- The H<sub>2</sub>O Super Maser Outburst Region in the Orion Nebula  
L. I. Matveyenko and P. J. Diamond, 105
- The Cosmological Application of the VLBI Technique at Ultimate Resolutions  
L. I. Gurvits, 110
- First VLBI Images of Supernova 1993J in the Galaxy M81  
N. Bartel, M. F. Bietenholz, M. P. Rupen, J. E. Conway, A. J. Beasley,  
R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin,  
D. L. Jones, A. Rius, T. Venturi, G. Umana, R. L. Francis, M. L. McCall,  
M. G. Richer, C. C. Stevenson, K. W. Weiler, S. D. Van Dyk, N. Panagia,  
W. H. Cannon, J. Popelar and R. J. Davis, 115
- The Visibility-Spectrum Relation among Radio Loud AGNs  
S. Kamenno, M. Inoue, K. Matsumoto, H. Takaba, T. Iwata, R. Nan  
and R. T. Schilizzi, 123
- Identification of the Superluminal Motion in Faint Parsec-Scale Jet of 3C390.3  
S. Wu, E. Preuss, W. Alef, K. I. Kellermann and Y. Qiu, 130
- A VLBI Search for Compact Nonthermal Emission from the Herbig Be Star  
MWC 297  
S. L. Skinner and R. B. Phillips, 137
- Snapshot VLBI Mapping of Variable Extragalactic Sources at 327 MHz  
L. I. Gurvits, W. Alef, D. R. Altschuler, J. E. Carson, B. Dennison, D. Graham  
and A. S. Trotter, 141
- AO 0235+164—A “Heretic” BL Lac  
H. S. Chu, L. B. Bååth, F. T. Rantakyro, R. S. Booth, R. E. Spencer  
and F. J. Zhang, 146

## Chapter 2. Antenna and Networks

- The New Receiver in the S, X, K Bands for the VLBI Medicina Dish  
A. Orfei, G. Maccaferri, S. Mariotti, M. Morsiani, G. P. Zaccarioli  
and G. Tomassetti, 159

- The Upgrade Proposal for the VLBI Medicina Antenna  
A. Orfei, G. Maccaferri, S. Mariotti, M. Morsiani and G. P. Zacchiroli, 165
- VLBI at the Kyushu Tokai University  
M. Fujishita, K. Miyasato, T. Yoshiyama and Y. Matsumae, 171
- VLBI Activities at the Matera Space Geodesy Center  
R. Lanotte, G. Bianco, M. Fermi and L. Garramone, 176
- The Mizusawa 10-m Antenna and Its VLBI Observation System  
K. M. Shibata, Y. Asaki, I. Asari, Y. Fukuzaki, T. Hara, K. Horiai, K. Iwadate, O. Kameya, N. Kawano, S. Kuji, S. Manabe, S. Sakai, T. Sasao, K. Sato, Y. Tamura and S. Tsuruta, 185
- The 6 m VLBI Telescope at Kagoshima, Japan  
T. Omodaka, M. Morimoto, N. Kawaguchi, T. Miyaji, S. Yasuda, T. Suzuyama, T. Kitagawa, T. Miyazaki, L. Furuya, T. Jike, K. Miyazawa, H. Mikoshiba, S. Kuji, O. Kameya and Kagoshima VLBI Group, 191
- Radio Telescopes and VLBI Facilities in Brazil  
P. Kaufmann and C. E. Tateyama, 196
- Cryogenic Cooled Receivers for the QUASAR Network  
A. V. Ipatov, I. A. Ipatova and V. V. Mardyshekin, 200
- The Australian Long Baseline Array—Status Report  
A. Tzioumis, W. Wilson and R. Ferris, 205
- The Asia-Pacific Telescope—APT  
A. Tzioumis, 211
- Present Status and Future Development on VLBI Facilities in China  
Ye S. and Qian Z., 218
- Chapter 3. The New Trends in Geodesy and Astrometry**
- Plate Dynamics near Boundaries: What Governs the Transition between Episodic and Continuous Motions?  
K. Heki, 223
- Improved Global Atmospheric Mapping Functions for VLBI and GPS  
A. Niell, 229
- Method of Differential Fringe Phase Tracking  
N. Kawano, T. Sasao, T. Hara, S. Kuji, O. Kameya, K. Sato, K. Iwadate and Y. Asaki, 232
- The Chinese National Space Geodetic Network  
J. Cai, 237
- Satellite Position Determination by Difference of Range (DOR) Measurements  
I. Kardos, 241
- Recent Geodetic VLBI Results from Shanghai Observatory  
Ye S., Qian Z., Chen G. and Zhou, R., 251

- An Antennacluster-Antennacluster VLBI Project VERA  
 T. Sasao, N. Kawano, T. Hara, S. Kuji, K. Shibata, K. Iwadate, K. Sato,  
 O. Kameya, S. Tsuruta, K. Asari, Y. Tamura, K. Horiai, K. Sato, H. Hanada,  
 T. Tsubokawa, K. Yokoyama, S. Manabe and S. Sakai, 254
- An Astronomical Observational Plan Using the VERA  
 O. Kameya, T. Sasao, N. Kawano and K. M. Shibata, 259
- Estimated Errors in the Antennacluster-Antennacluster VLBI  
 T. Hara, T. Sasao, K. Sato, N. Kawano and O. Kameya, 264
- Sub-Milliarcsecond Astrometry with Phase-Referenced VLBI  
 D. L. Jones, J.-F. Lestrade, R. A. Preston and R. B. Phillips, 272
- Selenodesy by Using Differential VLBI Observations of Artificial Radio Sources on  
 the Moon  
 H. Hanada, M. Ooe, N. Kawano, K. Iwadate, S. Kuji, K. Sato, S. Tsuruta,  
 T. Sasao, O. Kameya, T. Hara, N. Kawaguchi, M. Fujishita, M. Morimoto,  
 S. Yasuda, H. Mizutani and A. Fujimura, 277
- Gravitational Lens Effect and Measurement of Stellar Mass  
 M. Hosokawa, K. Ohnishi, T. Fukushima and M. Takeuti, 282
- Evidence for Source Structure Effects Caused by the Quasar 3C273 in Geodetic  
 VLBI Data  
 P. Charlot, 287
- Astronomical Periods in the Solar System  
 Y. Maeyama, 295
- Pulsar VLBI Experiment Using Kashima-Usuda Baseline  
 M. Sekido, S. Hama, H. Kiuchi, Y. Hanado, Y. Takahashi, M. Imae,  
 K. Fujisawa and H. Hirabayashi, 306
- The Celestial Reference System and Frame of the International Earth Rotation  
 Service  
 E. F. Arias, 313
- Quasi Simultaneous Observations in the Arclength Method of Reduction of  
 Astrometric VLBI Data  
 M. S. De Biasi, E. F. Arias and J.-F. Lestrade, 316
- Few-Hundred Microarcsecond VLBI Astrometry: Applications and Reduction of  
 Limiting Error Sources  
 S. T. Lowe and R. N. Treuhaft, 319
- Chapter 4. Recorders and Correlators**
- A New Advanced One-Unit VLBI Correlator (NAOCO)  
 K. Shibata, T. Sasao, N. Kawaguchi, Y. Tamura, S. Kameno, M. Miyoshi,  
 K. Asari, S. Manabe, T. Hara, S. Kuji, K. Sato, T. Miyaji, K. Matsumoto,  
 Y. Asaki, S. Yasuda and S. Nakamura, 327

- A Programmable VLBI Correlator Using Parallel Computing  
G. Petit and T. Fayard, 332
- Status of the New K-4 System  
H. Kiuchi, S. Hama, J. Amagai, Y. Hanado, A. Kaneko and M. Imae, 338
- The S2 Frequency Agile Data Acquisition Terminal  
W. T. Petrachenko, P. Mathieu, J. Popelar, W. H. Cannon, H. Tan  
and R. D. Wietfeldt, 345
- A Chipset for a MKII Style Correlator  
G. Tuccari, 351
- Keeping Compatibility in International VLBI Systems  
T. Yoshino, S. Hama and N. Kawaguchi, 360
- Development of the Burst Mode VLBI  
K. Matsumoto and N. Kawaguchi, 365
- The K4 Correlator  
S. Hama, H. Kiuchi, M. Sekido and M. Imae, 371
- Notes on High Data Rate Recording  
J. Takayama, 377
