

EARTH, PLANETS AND SPACE

TABLE OF CONTENTS

Vol. 52 No. 1 2000

Editorial	1
An imaging technique for subsurface faults using Teleseismic-Wave Records II—Improvement in the detectability of subsurface faults—	
..... T. Murakoshi, H. Takenaka, and D. Suetsugu	3
Effect of vertical velocity gradient on ground motion in a sediment-filled basin due to incident SV wave	Y. Wang, H. Takenaka, and T. Furumura 13
Study of periodic vertical crustal movement in the Omaezaki peninsula, Central Japan, and its tectonic implications	G. El-Fiky and T. Kato 25
An experimental study of hiss-triggered chorus emissions at low latitude	
..... R. Singh, R. P. Patel, R. P. Singh, and Lalmani	37
Main-phase creation of “seed” electrons in the outer radiation belt	
..... T. Obara, T. Nagatsuma, M. Den, Y. Miyoshi, and A. Morioka	41
Ultraviolet imaging spectrometer (UVS) experiment on board the NOZOMI spacecraft: Instrumentation and initial results	M. Taguchi, H. Fukunishi, S. Watanabe, S. Okano, Y. Takahashi, and T. D. Kawahara 49
Constraints on HIMU and EM by Sr and Nd isotopes re-examined	
..... T. Hanyu and E. Nakamura	61
Errata	
Circular asymmetry of the paleomagnetic directions observed at low latitude volcanic sites	H. Tanaka 71

Vol. 52 No. 2 2000

Geophysical comparison of the three eruptions in the 20th century of Usu volcano, Japan	I. Yokoyama and M. Seino 73
A study of annual variations in the geomagnetic total intensity with special attention to detecting volcanomagnetic signals	
..... H. Utada, M. Neki, and T. Kagiya	91
630 nm nightglow observations from 17°N latitude	
..... G. K. Mukherjee, L. Carlo, and S. H. Mahajan	105
Equatorial electrojet studies from rocket and ground measurements	
..... H. Chandra, H. S. S. Sinha, and R. G. Rastogi	111
Long term variability in solar wind velocity and IMF intensity and the relationship between solar wind parameters & geomagnetic activity	
..... G. K. Rangarajan and L. M. Barreto	121
Letters	
The March 25, 1998 Antarctic Earthquake: Great earthquake caused by postglacial rebound	S. Tsuboi, M. Kikuchi, Y. Yamanaka, and M. Kanao 133
Determination of turbulent energy dissipation rate directly from MF-radar determined velocity	
..... C. M. Hall, S. Nozawa, A. H. Manson, and C. E. Meek	137

Vol. 52 No. 3 2000

A low velocity zone beneath the Hida Mountains derived from dense array observation and tomographic method	
..... M. Matsubara, N. Hirata, S. Sakai, and I. Kawasaki	143

GPS time series modeling by autoregressive moving average method: Application to the crustal deformation in central Japan	J. Li, K. Miyashita, T. Kato, and S. Miyazaki	155
Time evolution of the fluid flow at the top of the core. Geomagnetic jerks	M. Le Huy, M. Manda, J.-L. Le Mouël, and A. Pais	163
Paleomagnetic results of the Late Permian Gobangsan Formation, Korean Peninsula: Remagnetization in the southeastern periphery of the Bagjisan Syncline	K. Uno	175
Application of the polynomial adjustment to the aeromagnetic survey of the Spanish Mainland; Requirements and shortcomings	J. Ardizzone and M. Herraiz	183
Stabilization of Venus' climate by a chemical-albedo feedback	G. L. Hashimoto and Y. Abe	197
Light elements synthesized in the He-layer and the H-rich envelope of a type II supernova—Influence of the adopted neutrino emission model	T. Yoshida, H. Emori, and K. Nakazawa	203

Vol. 52 No. 4 2000

Effects of zonation on the results of the application of the regional time predictable seismicity model in Greece and Japan	G. F. Karakaisis	221
The 1997 phreatic eruption of Akita-Yakeyama volcano, northeast Japan: Insight into the hydrothermal processes	K. Nogami, J. Hirabayashi, T. Ohba, and Y. Yoshiike	229
Daily variations of geomagnetic HD and Z -field at equatorial latitudes	F. N. Okeke and Y. Hamano	237
Geoelectric potential difference monitoring in southern Sumatra, Indonesia —Co-seismic change	T. Mogi, Y. Tanaka, D. S. Widarto, E. M. Arsadi, N. T. Puspito, T. Nagao, W. Kanda, and S. Uyeda	245
Electromagnetic signals related to incidence of a teleseismic body wave into a subsurface piezoelectric body	T. Ogawa and H. Utada	253
Unusually low airglow intensities in the Southern Hemisphere midlatitude mesopause region	J. Scheer and E. R. Reisin	261
Relationship between the Pi2 pulsations and the localized impulsive current associated with the current disruption in the magnetosphere	S. Fujita, M. Itonaga, and H. Nakata	267
Net current density of photoelectrons emitted from the surface of the GEOTAIL spacecraft	T. Nakagawa, T. Ishii, K. Tsuruda, H. Hayakawa, and T. Mukai	283

Letters

Preliminary results of multidisciplinary observations before, during and after the Kocaeli (Izmit) earthquake in the western part of the North Anatolian Fault Zone	Y. Honkura, A. M. Işikara, N. Oshiman, A. Ito, B. Üçer, S. Barış, M. K. Tunçer, M. Matsushima, R. Pektaş, C. Çelik, S. B. Tank, F. Takahashi, M. Nakanishi, R. Yoshimura, Y. Ikeda, and T. Komut	293
A scheme for estimating the location and tangential plane of a reflector	H. Takenaka	299
Additional List of Reviewers for 1999		305

Vol. 52 No. 5 2000

Waves excited at a free surface in a half-infinite isotropic nonlinear elastic medium	T. Momoi	307
--	----------	-----

Theoretical approach to dependence of crack growth mechanism on confining pressure	H. Kawakata and M. Shimada	315
A rod-type creepmeter for measurement of displacement in active fault zone	J.-C. Lee, F.-S. Jeng, H.-T. Chu, J. Angelier, and J.-C. Hu	321
Rock magnetism of sediments in the Angola-Namibia upwelling system with special reference to loss of magnetization after core recovery	T. Yamazaki, P. A. Solheid, and G. M. Frost	329
Magnetic minerals and magnetic properties of the Siwalik Group sediments of the Karnali river section in Nepal	P. Gautam, A. Hosoi, K. R. Regmi, D. R. Khadka, and Y. Fujiwara	337
Magnetic distortion of the magnetotelluric tensor: a numerical study	A. K. Agarwal and J. T. Weaver	347
Analogue model study of EM induction in elongated conductors—2D and 3D induction arrow responses	H. W. Dosso and J. Chen	355
Light elements synthesized in the He-layer and the H-rich envelope of a type II supernova, II—Influence of initial chemical compositions	T. Yoshida, K. Nakazawa, and H. Emori	361
Letter		
Preliminary report on the Sanyi-Puli seismic zone conductivity anomaly and its correlation with velocity structure and seismicity in the Northwestern Taiwan	C.-C. Chen and C.-S. Chen	377

Vol. 52 No. 6 2000

Performance test of an automated moment tensor determination system for the future “Tokai” earthquake	E. Fukuyama and D. S. Dreger	383
Fluctuation of group velocity of Love waves across a dent in the continental crust	M. Yoshida	393
Geodetically observed surface displacements of the 1999 Chi-Chi, Taiwan, earthquake	M. Yang, R.-J. Rau, J.-Y. Yu, and T.-T. Yu	403
Seafloor positioning system with GPS-acoustic link for crustal dynamics observation—a preliminary result from experiments in the sea	K. Obana, H. Katao, and M. Ando	415
Paleomagnetic study of Utror Volcanic Formation: Remagnetizations and postfolding rotations in Utror area, Kohistan arc, northern Pakistan	M. N. Ahmad, M. Yoshida, and Y. Fujiwara	425
Paleomagnetism of Pliocene to Pleistocene lava flows in the northern part of Hyogo prefecture, Southwest Japan and Brunhes Chron paleosecular variation in Japan	H. Morinaga, T. Matsumoto, Y. Okimura, and T. Matsuda	437
Precipitable water observed by ground-based GPS receivers and microwave radiometry	Y.-A. Liou, C.-Y. Huang, and Y.-T. Teng	445
Quantitative estimates of relationships between geomagnetic activity and equatorial spread-F as determined by TID occurrence levels	G. G. Bowman and I. K. Mortimer	451

Vol. 52 No. 7 2000

Upper mantle velocity structure in the western Pacific rim estimated from short-period recordings at Matsushiro Seismic Array System	M. Kato and I. Nakanishi	459
Paleomagnetic data from the Trans-Mexican Volcanic Belt: implications for tectonics and volcanic stratigraphy	L. M. Alva-Valdivia, A. Goguitchaichvili,	

L. Ferrari, J. Rosas-Elguera, J. Urrutia-Fucugauchi, and J. Zamorano-Orozco	467
High time resolution measurements of precipitable water vapor from propagation delay of GPS satellite signals	T. Yoshihara, T. Tsuda, and K. Hirahara 479
Automatic Waveform Selection method for Electrostatic Solitary Waves H. Kojima, Y. Omura, H. Matsumoto, K. Miyaguti, and T. Mukai 495
A wave equation describing the generation of field-aligned current in the magnetosphere	M. Itonaga, A. Yoshikawa, and S. Fujita 503
Lightcurve of asteroid Nereus	Y. Ishibashi, M. Abe, and Y. Takagi 509
Shear instabilities in the dust layer of the solar nebula I. The linear analysis of a non-gravitating one-fluid model without the Coriolis and the solar tidal forces	M. Sekiya and N. Ishitsu 517

Vol. 52 No. 8 2000

Tectonic significance of magnetic susceptibility fabrics in Plio-Quaternary mudstones of southwestern Foothills, Taiwan	T.-Q. Lee and J. Angelier 527
Resistivity structure of high-angle subduction zone in the southern Kyushu district, southwestern Japan	M. Ichiki, N. Sumitomo, and T. Kagiya 539
Some new features of ionospheric plasma depletions over the Indian zone using all sky optical imaging	H. S. S. Sinha and S. Raizada 549
On the possibility of identifying heavy ion acceleration processes in the magnetotail of Mars	G. A. Kotova, M. I. Verigin, A. P. Remizov, H. Rosenbauer, S. Livi, W. Riedler, K. Schwingenschuh, M. Tatrallyay, K. Szegö, and I. Apáthy 561

Letter

Resistivity structure of the central part of the Yamasaki fault studied by the multiple electrodes resistivity method	K. Fuji-ta and O. Ikuta 567
---	-----------------------------

Research News

Recent seismic activity in the Miyakejima and Niijima-Kozushima region, Japan—the largest earthquake swarm ever recorded	Japan Meteorological Agency i
Crustal deformation associated with crustal activities in the northern Izu islands area during the summer, 2000	M. Kaidzu, T. Nishimura, M. Murakami, S. Ozawa, T. Sagiya, H. Yaraï, and T. Imakiire ix
The 2000 Miyakejima eruption: Crustal deformation and earthquakes observed by the NIED Miyakejima observation network	M. Ukawa, E. Fujita, E. Yamamoto, Y. Okada, and M. Kikuchi xix

Vol. 52 No. 9 2000

Average shear-wave velocity structure of the Kamchatka peninsula from the dispersion of surface waves N. M. Shapiro, A. V. Gorbatov, E. Gordeev, and J. Dominguez 573
Amplification of gravity and Rayleigh waves in a layered water-soil model	T. Novikova, K.-L. Wen, and B.-S. Huang 579
Geo-electrical structure of the mantle beneath the Indian region derived from the 27-day variation and its harmonics	E. Chandrasekhar 587
Balloon-borne resonance fluorescence instrument for in-situ measurement of atomic oxygen: Simultaneous measurement with ozone at 38–44 km	N. Takegawa, N. Iwagami, and M. Okabayashi 595
Ground magnetic perturbations associated with the standing toroidal mode oscillations in the magnetosphere-ionosphere system H. Nakata, S. Fujita, A. Yoshikawa, M. Itonaga, and K. Yumoto 601

Spectral power of low-latitude Pi 2 pulsations at the 210° magnetic meridian stations and plasmaspheric cavity resonances	C.-C. Cheng, J.-K. Chao, and K. Yumoto	615
Lunar Radar Sounder (LRS) experiment on-board the SELENE spacecraft	T. Ono and H. Oya	629
Letters		
Identification of possible ion-drag induced neutral instability in the lower thermosphere over Svalbard	C. M. Hall and T. Aso	639
Lunar albedo at hydrogen Lyman α by the NOZOMI/UVS	M. Taguchi, G. Funabashi, S. Watanabe, Y. Takahashi, and H. Fukunishi	645
Comment		
Comment on "Time evolution of the fluid flow at the top of the core. Geomagnetic jerks" by M. Le Huy, M. Manda, J.-L. Le Mouël, and A. Pais	A. Jackson	649
Reply		
Reply to "Comment on 'Time evolution of the fluid flow at the top of the core. Geomagnetic jerks' by M. Le Huy, M. Manda, J.-L. Le Mouël, and A. Pais"	M. Le Huy, M. Manda, J.-L. Le Mouël, and A. Pais	651

Vol. 52 No. 10 2000

Preface		655
Session 1. Permanent GPS arrays, current and future		
Processing aspects related to permanent GPS arrays	H. Bock, G. Beutler, S. Schaer, T. A. Springer, and M. Rothacher	657
Preliminary results from permanent GPS array by the Geological Survey of Japan in conjunction with groundwater-level observations	R. Ohtani, N. Koizumi, N. Matsumoto, and E. Tsukuda	663
Observation of large-scale traveling ionospheric disturbances of auroral origin by global GPS networks	E. L. Afraimovich, E. A. Kosogorov, L. A. Leonovich, K. S. Palamartchouk, N. P. Perevalova, and O. M. Pirog	669
Improving ambiguity resolution by applying ionosphere corrections from a permanent GPS array	D. Odijk	675
A near real time system for tropospheric monitoring using IGS hourly data	A. Flores, A. Escudero, M. J. Sedó, and A. Rius	681
Session 2. (Part 1) GPS meteorology: atmospheric sensing with ground and space-based GPS receivers		
Semi-diurnal and diurnal variation of errors in GPS precipitable water vapor at Tsukuba, Japan caused by site displacement due to ocean tidal loading	Y. Shoji, H. Nakamura, K. Aonashi, A. Ichiki, H. Seko, and Members of GPS/MET Japan Summer Campaign 1997 in Tsukuba	685
An inter-comparison study to estimate zenith wet delays using VLBI, GPS, and NWP models	D. Behrend, L. Cucurull, J. Vilà, and R. Haas	691
Wet path delay and delay gradients inferred from microwave radiometer, GPS and VLBI observations	L. P. Gradinarsky, R. Haas, G. Elgered, and J. M. Johansson	695
Improved atmospheric mapping functions for VLBI and GPS	A. E. Niell	699
A new approach to mapping the atmospheric effect for GPS observations	I. M. Ifadis	703
GPS observations of PW during the passage of a typhoon	Y.-A. Liou and C.-Y. Huang	709

Session 3. A new view of the tectonic deformations in the Pacific and Asia using space geodetic techniques

Crustal motion in E- and SE-Asia from GPS measurements	
..... G. W. Michel, M. Becker, D. Angermann, C. Reigber, and E. Reinhart	713
Improving the velocity field in South and South-East Asia: The third round of GEODYSSSEA	M. Becker,
E. Reinhart, S. B. Nordin, D. Angermann, G. Michel, and C. Reigber	721
Present-day crustal motion in Papua New Guinea	P. Tregoning,
H. McQueen, K. Lambeck, R. Jackson, R. Little, S. Saunders, and R. Rosa	727

Session 4. Determination and interpretation of global and regional plate motions deduced from space geodetic techniques

Global solution of VLBI observations and assessments	
..... J. L. Li and G. L. Wang	731
GPS measurements of present-day uplift in the Southern Tibet	
..... C. Xu, J. Liu, C. Song, W. Jiang, and C. Shi	735
Indian plate kinematic studies by GPS-geodesy	
E. C. Malaimani, J. Campbell, B. Görres, H. Kotthoff, and S. Smaritschnik	741
Active tectonics of the Black Sea with GPS	E. Tari,
M. Sahin, A. Barka, R. Reilinger, R. W. King, S. McClusky, and M. Prilepin	747
The August 17 Kocaeli and the November 12 Duzce earthquakes in Turkey	M. Sahin and E. Tari
753	
Crustal motion results derived from observations in the European geodetic VLBI network	
..... R. Haas, E. Gueguen, H.-G. Scherneck, A. Nothnagel, and J. Campbell	759
On the determination of a global strain rate model	
..... C. Kreemer, J. Haines, W. E. Holt, G. Blewitt, and D. Lavallee	765

Session 10. Theory and methodology of GPS and other space techniques

Galileo or for whom the bell tolls	K. Legat and B. Hofmann-Wellenhof	771
An extended weight model for GPS phase observations		
..... A. Wieser and F. K. Brunner		777
Development and assessment of a medium-range real-time kinematic GPS algorithm using an ionospheric information filter		
..... M. Yang, C.-H. Tang, and T.-T. Yu		783
SLR precision analysis for LAGEOS I and II	G. Kizilsu and M. Sahin	789
Regional-scale multiple reference stations for carrier phase-based GPS positioning: A correction generation algorithm		
..... C. Rizos, S. Han, and H.-Y. Chen		795
Probabilistic properties of GNSS integer ambiguity estimation		
..... P. J. G. Teunissen		801
A search space optimization technique for improving ambiguity resolution and computational efficiency	D. Kim and R. B. Langley	807
A comparative study of the integer ambiguity validation procedures		
..... J. Wang, M. P. Stewart, and M. Tsakiri		813

Session 11. Kinematic application of GPS technology to Earth sciences

Airborne GPS kinematic positioning and its application to oceanographic mapping	S. Han and C. Rizos	819
Flight tests of GPS/GLONASS precise positioning versus dual frequency KGPS profile	T. Tsujii, M. Harigae, T. Inagaki, and T. Kanai	825
A concept of precise kinematic positioning and flight-state monitoring from the AGMASCO practice	G. Xu	831
Real-time deformation monitoring with GPS and Kalman Filter		
..... C. D. Ince and M. Sahin		837

Real-time observation of tsunami by RTK-GPS	
..... T. Kato, Y. Terada, M. Kinoshita, H. Kakimoto, H. Isshiki, M. Matsuishi, A. Yokoyama, and T. Tanno	841
Session 12. Issues of data quality management and hardware/software technological problems in GPS	
RTK-GPS positioning by TV audio-MPX-data broadcast in Japan	
..... H. Namie, A. Yasuda, and K. Sasano	847
Experiences in set-up and usage of a geodetic real-time differential correction network	
..... S. Martin and C.-H. Jahn	851
Minimal Detectable Biases of GPS observations for a weighted ionosphere ...	
..... K. de Jong and P. J. G. Teunissen	857
Session 13. GPS for gravity field and geoid determination	
Airborne geoid determination	
..... R. Forsberg, A. Olesen, L. Bastos, A. Gidskehaug, U. Meyer, and L. Timmen	863
Session 14. Innovative developments in GPS geodesy in support of the Earth sciences	
Low-cost densification of permanent GPS networks for natural hazard mitigation:	
First tests on GSI's GEONET network	
..... C. Rizos, S. Han, L. Ge, H.-Y. Chen, Y. Hatanaka, and K. Abe	867
A multi-antenna GPS system for local area deformation monitoring	
..... Y. Chen, X. Ding, D. Huang, and J. Zhu	873
The contribution of GLONASS measurements to regional and continental scale geodetic monitoring regimes	
..... M. P. Stewart, M. Tsakiri, J. Wang, and J. F. Monico	877
GPS seismometers with up to 20 Hz sampling rate	
..... L. Ge, S. Han, C. Rizos, Y. Ishikawa, M. Hoshihara, Y. Yoshida, M. Izawa, N. Hashimoto, and S. Himori	881

Vol. 52 No. 11 2000

Session 2. (Part 2) GPS meteorology: atmospheric sensing with ground and space-based GPS receivers	
Initial results of combining GPS occultations with ECMWF global analyses within a 1DVar framework	
..... E. R. Kursinski, S. B. Healy, and L. J. Romans	885
Radio holographic principle for observing natural processes in the atmosphere and retrieving meteorological parameters from radio occultation data	
..... K. Igarashi, A. Pavelyev, K. Hocke, D. Pavelyev, I. A. Kucherjavenkov, S. Matyugov, A. Zakharov, and O. Yakovlev	893
Real-time national GPS networks: Opportunities for atmospheric sensing	
..... R. H. Ware, D. W. Fulker, S. A. Stein, D. N. Anderson, S. K. Avery, R. D. Clark, K. K. Droegemeier, J. P. Kuettnner, J. Minster, and S. Sorooshian	901
Estimation of PWC gradients over the Kanto Plain using GPS data: Validation and possible meteorological implications	
..... K. Aonashi, Y. Shoji, R. Ichikawa, and H. Hanado	907
GPS observations in Thailand for hydrological applications	
..... H. Takiguchi, T. Kato, H. Kobayashi, and T. Nakaegawa	913
Using GPS-IPW in a 4-D data assimilation system	
..... T. L. Smith, S. G. Benjamin, B. E. Schwartz, and S. I. Gutman	921
Three-dimensional distribution of water vapor estimated from tropospheric delay of GPS data in a mesoscale precipitation system of the Baiu front	
..... H. Seko, S. Shimada, H. Nakamura, and T. Kato	927
Local GPS tropospheric tomography	
..... K. Hirahara	935

Sensing atmospheric structure: Tropospheric tomographic results of the small-scale GPS campaign at the Onsala Space Observatory	A. Flores, L. P. Gradinarsky, P. Elósegui, G. Elgered, J. L. Davis, and A. Rius	941
Session 5. Combination of space geodetic techniques for global geodynamics and reference frames		
The systematic analysis of the transformation between the German geodetic reference system (DHDN, DHHN) and the ETRF system (DREF91)	J. Cai	947
Analysis methodology and recent results of the IGS network combination	R. Ferland, J. Kouba, and D. Hutchison	953
Establishment of the three-dimensional kinematic reference frame by space geodetic measurements	M. D. Gerasimenko and T. Kato	959
Session 6. Space and terrestrial techniques for advanced crustal deformation research		
Crustal strain field in the Deccan trap region, western India, derived from GPS measurements	C. D. Reddy, G. El-Fiky, T. Kato, S. Shimada, and K. V. Kumar	965
Regional network analysis of GPS data in the area of Kanto, central Japan ...	K. Vijaykumar and K. Miyashita	971
Estimated pressure source on Kozu Island volcano, South Central Japan, from GPS measurements (July 1996–August 1999)	F. Kimata, S. Kariya, M. Fujita, K. Matsumoto, T. Tabei, J. Segawa, and A. Yamada	975
Crustal movements around the Beppu Bay area, East-Central Kyushu, Japan, observed by GPS 1996–1998	Y. Fukuda, M. Itahara, S. Kusumoto, T. Higashi, K. Takemura, H. Mawatari, Y. Yusa, T. Yamamoto, and T. Kato	979
On optimal geodetic network design for fault-mechanics studies	M. D. Gerasimenko, N. V. Shestakov, and T. Kato	985
Decadal correlation between crustal deformation and variation in length of day of the Earth	Q.-L. Wang, Y.-T. Chen, D.-X. Cui, W.-P. Wang, and W.-F. Liang	989
Geodynamical value of historical geodetic measurements: A theoretical analysis	P. Xu, S. Shimada, Y. Fujii, and T. Tanaka	993
Interpolation of GPS results incorporating geophysical and InSAR information	L. Ge, S. Han, and C. Rizos	999
Crustal deformation associated with the 1998 seismo-volcanic crisis of Iwate Volcano, Northeastern Japan, as observed by a dense GPS network	S. Miura, S. Ueki, T. Sato, K. Tachibana, and H. Hamaguchi	1003
Detectability for GPS, EDM and tiltmeters of the Hot Springs Research Institute in the western Kanagawa prefecture, Japan	T. Tanada	1009
GPS and EDM monitoring of Unzen volcano ground deformation	T. Matsushima and A. Takagi	1015
GPS measurement at summit peaks of the Taisetsu mountains, Central Hokkaido, Japan	T. Kaneso, J. Koyama, T. Moriya, and H. Takahashi	1019
Session 7. Application of GPS for monitoring Earth's environmental and global sea level change		
The influence of 5000 year-old and younger glacial mass variability on present-day crustal rebound in the Antarctic Peninsula	E. R. Ivins, C. A. Raymond, and T. S. James	1023
Ice velocities of the Lambert Glacier from static GPS observations	R. Manson, R. Coleman, P. Morgan, and M. King	1031
The search for postglacial rebound near the Lambert Glacier, Antarctica	P. Tregoning, A. Welsh, H. McQueen, and K. Lambeck	1037
Treatment of horizontal and vertical tidal signals in GPS data: A case study on a floating ice shelf	M. King, R. Coleman, and P. Morgan	1043

Elevation change measurements of the Greenland Ice Sheet	
..... R. Forsberg, K. Keller, C. S. Nielsen, N. Gundestrup, C. C. Tscherning, S. N. Madsen, and J. Dall	1049
Session 8. Application of GPS for ionospheric research and impact of solar maximum for GPS measurements	
The increase of the ionospheric activity as measured by GPS	
..... R. Warnant and E. Pottiaux	1055
The use of GPS arrays in detecting the ionospheric response during rocket launchings	
..... E. L. Afraimovich, E. A. Kosogorov, K. S. Palamarchouk, N. P. Perevalova, and A. V. Plotnikov	1061
The impact of geomagnetic substorms on GPS receiver performance	
..... S. Skone and M. de Jong	1067
Characteristics of TEC variations observed at Chofu for geomagnetic storms	
..... A. Yamamoto, Y. Ohta, T. Okuzawa, S. Taguchi, I. Tomizawa, and T. Shibata	1073
The use of the international GPS network as the global detector (GLOBDET) simultaneously observing sudden ionospheric disturbances	
..... E. L. Afraimovich, E. A. Kosogorov, and L. A. Leonovich	1077
Application of ionospheric corrections in the equatorial region for L1 GPS users	
..... P. O. Camargo, J. F. G. Monico, and L. D. D. Ferreira	1083
Session 9. Modeling of the crustal process based on GPS measurements	
Dislocation model for strain accumulation in a plate collision zone	
..... K. Shimazaki and Y. Zhao	1091
A block-fault model for deformation of the Japanese Islands derived from continuous GPS observation	
..... M. Hashimoto, S. Miyazaki, and D. D. Jackson	1095
Prediction of stress field in Japan using GPS network data	
..... M. Hori, T. Kameda, and T. Kato	1101
Elastic and inelastic strains in the Japanese Islands deduced from GPS dense array	
..... G. S. El-Fiky	1107
Session 11. Kinematic application of GPS technology to Earth sciences	
The use of GPS buoys in the determination of oceanic variables	
..... E. Cardellach, D. Behrend, G. Ruffini, and A. Rius	1113

Vol. 52 No. 12 2000

Preface	M. Manda, S. Macmillan, and F. J. Lowes	1117
International Geomagnetic Reference Field—the eighth generation		
..... M. Manda and S. Macmillan		1119
Spatial-temporal modeling of the geomagnetic field for 1980–2000 period and a candidate IGRF secular-variation model for 2000–2005		
..... V. P. Golovkov, T. N. Bondar, and I. A. Burdelnaya		1125
An IGRF candidate main geomagnetic field model for epoch 2000 and a secular variation model for 2000–2005	B. Langlais and M. Manda	1137
The 2000 revision of the joint UK/US geomagnetic field models and an IGRF 2000 candidate model	S. Macmillan and J. M. Quinn	1149
An evaluation of candidate geomagnetic field models for IGRF 2000		
..... S. Macmillan		1163
Use of Ørsted scalar data in evaluating the pre-Ørsted main field candidate models for the IGRF 2000	M. Manda and B. Langlais	1167
The working of the IGRF 2000 Task Force	F. J. Lowes	1171
Determination of the IGRF 2000 model		
..... N. Olsen, T. J. Sabaka, and L. Tøffner-Clausen		1175

Evaluation of the candidate Main Field model for IGRF 2000 derived from preliminary Ørsted data	F. J. Lowes, T. Bondar, V. P. Golovkov, B. Langlais, S. Macmillan, and M. Manda	1183
Modelling of attitude error in vector magnetic data: application to Ørsted data	R. Holme	1187
Improving the modelling of the geomagnetic main-field: Isolating the average ionospheric field in satellite data	A. W. P. Thomson	1199
An estimate of the errors of the IGRF/DGRF fields 1945–2000	F. J. Lowes	1207
Ørsted and Magsat scalar anomaly fields	D. J. Ivers, R. J. Stening, J. Turner, and D. E. Winch	1213
Unusual behaviour of the IGRF during the 1945–1955 period	W.-Y. Xu	1227
