KEYWORD INDEX

$^{3}He/^{4}He$ ratios 451
4α-methyl sterol 225

A
α-dicarbonyls e17
abyssal current 451
adakite 379
aeolian sediment 489
aerosol 571
alkaline magmatism 275
alphatic hydrocarbons 247
amino acids 387
andesite 137
anthropogenic and biogenic emissions e17
anthropogenic contamination 489
anthropogenic fluxes e5
aragonite 371
Aravalli craton 331
aromatics 151
Asian continent 113
Asturias e1
atmosphere e5
autotrophic dinoflagellate 225

B
basalt 137, 359
beach 173
binding site 39
biomineralization 315
bivalve shell 23
boron 359
boron isotopes 113
buried valley 489

C
C3 plants 181
calcium carbonate 315
Cameroon volcanic line 519
carbon isotope fractionation 477
carbon isotopes 151, 431, 461
carbonate 371, e11
carbonate-fluorapatite 189
Cd 233
Central America 431
Central Tianshan 285
chlorine stable isotopes 241
chlorite 489
chlorophyll *a* 99
clay mineral dehydration 561
coal burning 113
coastal area 89
competitive adsorption 233
compressor 167
coniferous organic matter 247
coral 371
coral skeleton 261
cosmogenic ^{10}Be and ^{26}Al e23
Costa Rica 431
crude oil 411
crustal contamination 1
crustal evolution 331
Cu 233

D
$\delta^{13}C$ 419
$\delta^{34}S$ 571
Daisen 379
δD 419
deep-sea hydrothermal fluids 387
depth profile e23
depth profile of noble gases 519
dicarboxylic acids e17
dissolved CO_2 441
dissolved organic matter 99, 387

E
early diagenetic alternations 247
effluent 181
element release 137
environmental conditions 399
erosion rate e23

F
fluid inclusions e1
fluid migration 561
fluid-sediment interaction 507
fluoride 371
fluorite e1
foraminifera 315

fractionation 399
fulvic acid-like fluorescence 99

G
gas geochemical characteristics 507
gas self-lifting 441
geochemistry 167, 211, 331
geopressured fluid 545
GEOS-Chem 323
glacial–interglacial cycle 347
granite 65
granitoids 299
groundwater aquifer 489

H
H_2/CH_4 ratio 507
hafnium 65
heavy metal 399
helium isotope(s) 431, 461, 545, e1, e5
heterotrophic dinoflagellate 225
Hf isotope 299
Hokkaido 545
humic substances 39
hydrogen isotope 545
hydrogeochemistry 125
hydrothermal plume 507
hydrothermal plume chemistry 477
hydrothermal systems 387

I
ICP-OES 23
in-situ analysis 441
Indian shield 331
Industrial Revolution e5
inorganic environment 247
intra-continental subduction 285
isotope e11
isotope measurements 73
isotopic ratios 181

J
Junggar Basin 411

K
ketoacids e17
Kuroshima Knoll 461

L
LA-ICP-MS 23, 275
Lake Baihua 99
Lake Biwa 161
Lake Hongfeng 99
Lake Monoun 441, 519
Lake Nyos 441, 519
ligands 387
long-range transport 113
long-term observation 571
low temperature simulation 247
lower crust 1

M
manganese 211
marine aragonite 261
MC-ICP-MS 73
measurement 173
metal loading 39
metals 89
methane hydrates 461
methyl bromide 173
methyl chloride 173
Mg/Ca ratio 261
microbial alteration 461
microbial methane oxidation 477
Mid-Atlantic ridge 387
Miocene 275
Mn–Cr chronology e11
modeling performance 323
motile cell 225
MPI 323
Mt. Vulture volcano 125
mud volcano 561
MVT deposits e1

N
n-alkane 419
Na/Ca ratio 261
nano-hydroxyapatite (nano-HAP) 233
natural gas 151
negative thermal ionization mass spectrometry 241
NMR 411
noble gas(es) 167, 519, e1
North Pacific 451
Northern-Calabrian Unit 211
Northwestern China 285
nutrient conditions 137

O
oil cracking 151
Okinawa Trough 507
OpenMP 323
organics 23

Outer Zone 275
oxygen isotope 545

P
Paleoarchean 81
parallelization 323
Paraná–Etendeka 1
partition coefficient 65, 411
partitioning 315
Pb 233
PCA 89
perylene 161
Philippine Sea 451
Philippine Sea plate 359
phosphorites 189
plants 137
porcelain e5
propane 461
pyrolysis experiment 151

Q
quartz syenite 285

R
Rajasthan 331
rare earth elements 315, 411
REE 189
REE pattern 39
relative sensitivity e11
reservoir 399
resting cyst 225
Re–Os 73
rhodochrosite 211
rhyolite 1
riverine sediment 181

S
S/Ca ratio 261
sampling depth e23
saturates 151
sclerochronology 23
seasonal and spatial variation 89
seawater 347, 451
seawater temperature 371
secondary ion mass spectrometry e11
secondary organic aerosols e17
sediment(s) 89, 161
sediment-water interface 399
selectivity coefficients 233
silicate weathering 125
Singhbhum Craton 81
Singhbhum granite batholith 81
slab melting 379
small samples 241
source(s) 173, 181
South China 299
southern Italy 211
southern Kyushu 359
southern Okinawa Trough 477
Southwest Japan 275
Sr isotopes 347
Sr/Ca ratio 261
stability constants 39
stable carbon isotopic composition 161
stable isotopic composition 561
subduction 379
subduction zone 359
sulfate 571
sulfur isotope composition 125

T
thermogenic hydrocarbons 461
TIMS 347
Tokyo 419
total evaporation method 241
trace elements 23, 113, 189
tryptophan-like fluorescence 99
tungsten metallogeny 299
Tunisia 189
turbo molecular pump 167

U
urban aerosols 419
Uruguay 1
U–Pb age 275
U–Pb dating 299
U–Pb geochronology 81
U–Th radioactive disequilibrium 379

V
volcano monitoring 431

W
water chemistry 561
water-rock interaction 125
weathered granitic soil surface e23
weathering 137
Weiya 285

Z
zircon 65, 81, 275
Zr/Hf ratio 65
