

Index

- 10.7 cm solar flux, 259, 263–266, 273–275
2-day wave, 337, 344–346
- albedo, 202, 240
- Alfvén wave(s), 32, 40, 67, 69, 71, 72
- ambipolar diffusion*, 36, 37
- Ampere’s law, 28, 31, 33, 36–39
- astrometeorology, 231
- atmospheric tide(s), 4, 51, 53, 296, 319, 337
- Brewer-Dobson circulation, 46, 267
- CHAMP, 283, 284, 313–315
- chromosphere, 64, 65, 67, 69, 83, 84, 225
- climate change(s), 202, 203, 209, 212, 213, 232, 240, 241, 248, 253
- cloud clusters (CCs), 306
- corona, 14, 63–65, 67–69, 71, 72, 79, 80, 82–84, 86, 88, 89, 91, 92, 107, 109, 183
- coronal heating, 63, 67, 68, 88
- coronal mass ejection (CME), 14, 64, 77–102, 105–113
- cosmogenic radionuclides, 201, 206, 209, 214
- critical level(s), 42, 54, 55, 58, 298
- cumulus convection, 295, 298–301, 306, 307, 309, 311, 319, 320, 329
- data-assimilation, 173, 174, 183, 195, 196
- dendrochronology, 232
- driverless shocks, 93, 94
- dynamical coupling, 242, 299
- dynamo, 3–5, 8, 9, 20, 31, 171, 173–176, 178–185, 188–191, 194–196, 210, 299, 300, 341, 345, 346
- El Nino(s), 178, 189, 191, 262
- El Nino-Southern Oscillation (ENSO), 239, 319
- equatorial anomaly, 2–4, 325
- equatorial atmosphere, 295–298, 300–302, 306, 316, 329
- Equatorial Atmosphere Radar (EAR), 298, 301–303, 308, 320
- equatorial ionization anomaly (EIA), 296, 299, 320, 345
- equatorial plasma bubble(s), 296, 320–321, 326, 328, 329
- equatorial spread F (ESF), 288, 300, 320
- equatorial waves, 53, 59, 296, 298
- eruptive prominence(s), 79, 84, 85
- filament, 64, 79, 83, 85
- flare ribbons, 84, 86
- flux rope, 79, 81, 86, 87, 90–94, 97, 98, 100, 109
- general circulation model (GCM), 243
- Global Positioning System (GPS), 301, 304, 305, 313–315, 320, 326–328
- global warming, 201, 212, 231, 240
- GPS occultation, 283
- gravity wave, 41–44, 47–49, 54–56, 58, 262, 279–285, 288, 291, 296–302, 309–311, 315, 320, 325, 326, 329, 340
- great ocean conveyor belt, 176, 177
- ground level enhancement, 106, 112
- Hadley cell(s), 176, 239, 247, 249
- Hall effect, 32, 34, 36
- hindcast, 182, 194
- Hinode, 63–69, 72, 73
- Hough function(s), 42, 51–53, 338, 340, 343
- ice core(s), 205, 210, 212, 232
- Indonesian Maritime Continent (IMC), 295, 297, 300, 303, 307, 308, 313, 326, 329
- interannual variability, 257, 260, 263, 272, 284, 318, 319
- interplanetary magnetic field, 14, 21, 106, 123, 201, 205, 209
- intraseasonal oscillations (ISO), 299, 306, 320
- Kelvin-Helmholtz instability, 311
- Kelvin wave, 53, 54, 311–315

- Laplace's tidal equation, 51, 52
 LASCO, 79, 80, 84, 85, 96, 110, 113
 latent heating, 338, 343
 lightning flash rate, 308
 Little Ice Age, 235
- magnetic cloud(s), 90, 93, 96, 112, 113
 magnetic diffusivity, 171, 176, 178–180, 188, 196
 magnetic pulsations, 13
 magnetic storm, 3, 8, 9, 14, 15, 17, 77–79, 83, 89, 98–103, 105, 111–113, 288
 magnetograms, 13, 21, 79, 174, 228
 magnetohydrodynamics, 23, 28
 magnetosphere, 13, 18, 20, 21, 24, 29, 37, 77, 90, 98, 99, 105, 111, 121–124, 126, 127, 133
 magnetotail, 121–126, 129–134, 142, 143, 146, 147, 149, 150, 153, 154, 156, 160, 163, 164
 Major Midwinter Warmings (MMWs), 257, 264, 268, 276
 mass emission, 77, 78
 Maunder Minimum, 204, 214, 228, 235, 240, 241
 Maxwell's equation(s), 28, 38, 135, 136, 150, 155
 mesopause, 48, 281, 302, 304, 319
 mesosphere and lower thermosphere (MLT), 299, 318, 344, 345
 meteor radar, 298, 301, 303, 305, 313
 MF radar(s), 298, 303–306, 313, 318, 319, 339, 340
 MHD models, 179
 middle atmosphere, 41, 42, 44, 46, 48, 49, 60, 243, 246, 279, 288, 296, 298, 301, 309, 311, 319, 320, 339
 Milankovitch cycles, 234
 mixed Rossby-gravity wave(s), 42, 53, 54
 molecular viscosity and thermal diffusive damping, 288
 momentum deposition, 280, 337
 mountain wave(s), 280, 284, 288
 MST radar(s), 42, 44
- non-cloud ejecta, 93, 94
 non-interaction theorem, 42, 47, 58
 nonmigrating tides, 299, 319, 320
 North Atlantic Oscillation (NAO), 235, 239
- observational selection, 279, 282, 286
 ocean sediments, 232, 234, 235
 OLR (Outgoing Longwave Radiation), 297, 307–309, 313, 314, 319
 ozone, 42, 46, 49, 50, 52, 53, 57, 58, 105, 245–248, 250, 313, 338, 340, 341, 345, 346
- particle fall velocity, 311
 Pedersen effect, 34, 36, 37
 photon emission(s), 77
 photosphere, 31, 64–69, 86, 204, 226, 229
 planetary wave(s), 42, 46–48, 59, 247, 262, 267, 299, 344, 346
 plasma blobs, 324
 polar modes of variability, 251
 post-eruption arcade(s), 84, 86, 87
 precipitation, 14, 18, 212–214, 233, 243, 247, 248, 301, 303, 308
 pressure tensor, 25, 129, 130, 135, 137, 139, 140, 150
- quasi-adiabatic approximation, 133, 163
 Quasi-Biennial Oscillation (QBO), 42, 44, 50, 58, 59, 239, 246, 257–259, 262–269, 272–276, 281, 284, 295, 296, 298, 299, 309, 312, 317, 318, 320, 341
- radiative forcing, 240–242
 radio occultation (RO), 282, 298, 313
 radiosonde(s), 258, 284–286, 300, 301, 303, 305, 308–310, 312–314, 316, 317
 RASS (Radio Acoustic Sounding System), 303
 reconnection, 21, 31, 69, 72, 85, 86, 92, 99, 109, 122–124, 154, 156, 164
- SAO, 42, 295, 296, 298, 299, 309, 312
 scintillation, 91, 326–328
 sea surface temperature(s), 237, 243, 297
 semiannual oscillation(s), 281, 295, 296, 299, 309
 semidiurnal tide(s), 51, 337–342, 344–346
 SEPs, 77, 78, 89, 105, 107–109, 111–113

- sheath, 79, 80, 97, 100–105, 111
- shock, 24, 31, 69, 77, 79, 80, 83, 84, 88–91, 93, 94, 97, 100, 103, 105–107, 109, 111, 113, 114, 207
- sideband oscillation, 344
- SOHO, 63, 79–81, 84, 85, 87–89, 96, 110, 217
- solar activity, 27, 171, 201, 206–208, 210, 212–214, 217, 231–233, 235, 237, 239, 243, 246, 247, 254, 328
- solar climate, 171, 173, 231, 234, 240
- solar cycle(s), 81, 83, 91, 94, 98, 99, 103, 108, 113, 171–174, 178–185, 188, 189, 191, 192, 194–196, 217, 221, 222, 225–228, 236–240, 243–248, 259, 262, 265, 267, 288, 290, 319
- solar flare, 14, 15, 63, 68, 72, 73, 77, 105, 109
- solar forcing, 51, 201, 203, 204, 212, 215, 237, 238, 241, 247
- solar irradiance, 201, 202, 217, 231, 235, 240, 241, 248
- solar variability, 209, 212, 214, 221, 233, 235, 237, 240, 244, 253, 257, 262, 272–275
- solar wind, 9, 20, 21, 24, 27, 37, 38, 64, 69, 71–73, 77, 78, 81, 90–92, 94–96, 99, 105, 109–111, 121, 123, 124, 126, 143, 205, 207
- Sounding of Atmosphere using Broadband Emission Radiometry (SABER), 313
- South Pole, 71, 192, 259, 265, 342
- space weather, 1, 20, 77–79, 81, 90, 92, 97, 98, 100, 102, 105, 111, 113
- stationary planetary waves, 47, 337, 341, 345
- stratosphere, 42, 44, 46, 49, 50, 54, 56–58, 171, 239, 243, 245–247, 250, 252–254, 257–260, 262, 264, 266, 267, 271, 272, 276, 280, 281, 284–288, 290, 296, 299, 301, 311–313, 316, 317, 341, 346
- stratosphere-troposphere coupling, 247, 251
- stratospheric aerosol layer, 317
- substorm(s), 122–124, 126, 127, 132, 143, 153, 156, 162–164
- sunspot, 65–69, 72, 83, 171, 172, 174–176, 178, 184–186, 189–194, 201, 204–206, 209, 214, 215, 221, 223–229, 231, 235, 240, 241, 257, 259, 290
- super cloud clusters (SCCs), 306
- superpressure balloons, 286
- surface forcing, 178, 183, 184, 191
- synoptic-scale, 254, 296, 301, 306, 311
- teleconnections, 257, 267–272, 276
- thermosphere-ionosphere, 279, 288, 290
- TIMED Doppler Interferometer (TIDI), 313
- Total Irradiance Monitor (TIM), 240
- travelling ionospheric disturbances, 279, 325
- tropical tropopause layer (TTL), 302, 317
- tropopause, 46, 58, 176, 253, 254, 267, 270–272, 311, 313–317
- troposphere, 42, 47, 56, 57, 236, 237, 239, 247, 253, 254, 257, 262, 267, 270–272, 276, 285, 299–301, 303, 306, 310, 311, 313, 315, 317, 319, 338, 340, 346
- Type-IV radio bursts, 14
- upper troposphere and lower stratosphere (UTLS), 310
- vertical coupling(s), 246, 282, 295–298, 300, 329, 337
- Vlasov-Maxwell equations, 135, 150
- vortex, 3, 46, 47, 246, 257, 259, 262, 276, 284, 287
- Walker cell, 239
- wave dissipation, 279, 280, 291
- wave-mean flow interaction(s), 41, 42, 59, 298, 299, 309, 320
- westerly wind bursts (WWBs), 308
- X-ray(s), 63–65, 67, 68, 77, 79, 82, 84, 86–89, 101, 105, 106, 109
