Preface	v
<b>1 Prologue—The Propagation of Sound Waves</b>	<b>1</b>
1.1 Equation of motion for sound waves	1
1.2 Sound wave in a homogeneous fluid	4
1.3 Time-domain solution	17
1.4 Wave attenuation	22
<b>2 Travel Time Curves</b>	<b>29</b>
2.1 Travel times for two-dimensional structures	29
2.2 Spherical models	47
2.3 The equation of a ray	52
<b>3 Stress and Strain</b>	<b>59</b>
3.1 Stress	59
3.2 Strain	67
3.3 Hooke's law	71
3.4 Strain energy	74
3.5 Strain and the equation of motion in curvilinear coordinate systems	78
<b>4 Reflection and Refraction of Plane Waves</b>	<b>81</b>
4.1 Equations of motion of a homogeneous elastic body and plane wave solutions	81
4.2 <i>SH</i> waves	83
4.3 <i>P-SV</i> waves	91
<b>5 General Solutions of Elastic Wave Equations</b>	<b>109</b>
5.1 Scalar potential and vector potential	109
5.2 Solutions of the Helmholtz equation	113
5.3 General solutions in the Cartesian, cylindrical, and spherical coordinate system	118
<b>6 Surface Waves and Boundary Waves</b>	<b>125</b>
6.1 Phase velocity and group velocity	125
6.2 Love wave	131
6.3 Rayleigh wave	139
6.4 Stoneley wave	149
6.5 Channel waves	152
<b>7 Elastic Waves in Plates, Cylinders, and Spheres</b>	<b>161</b>
7.1 Elastic waves propagating in plates	161
7.2 Waves propagating in the axial direction of a cylinder	169
7.3 Waves along a borehole	175
7.4 Elastic waves propagating along the circumference of a cylinder	184

7.5	Free oscillations of a sphere	188
<b>8</b>	<b>Generation and Propagation of Cylindrical Waves</b>	
	—Two-Dimensional Problems—	<b>199</b>
8.1	Cylindrical waves in fluid	199
8.2	Reflection and refraction of cylindrical waves	203
8.3	Method of Cagniard–de Hoop	222
<b>9</b>	<b>Two-Dimensional Lamb’s Problem</b>	<b>235</b>
9.1	Formal solutions for a $P$ - $SV$ line source	235
9.2	Generation of Rayleigh waves	238
9.3	Cagniard–de Hoop solutions	248
9.4	Generation of a Love wave	255
<b>10</b>	<b>Propagation of Spherical Waves (Three-Dimensional Problems)</b>	<b>263</b>
10.1	Propagation of spherical $P$ wave	263
10.2	Three-dimensional $P$ - $SV$ wave	269
10.3	Three-dimensional Lamb’s problem	273
10.4	Three-dimensional an $SH$ wave	279
10.5	Three-dimensional Cagniard–de Hoop method	282
<b>11</b>	<b>Expansion of Vector Fields</b>	<b>287</b>
11.1	Plane harmonic functions	287
11.2	Expansion of vector fields	290
11.3	Expansion of point sources	294
<b>12</b>	<b>The Haskell Method</b>	<b>303</b>
12.1	Integration of equations of motion	303
12.2	The Haskell matrix for an $SH$ wave and a sound wave	306
12.3	$P$ - $SV$ wave	310
<b>13</b>	<b>Normal Mode Solutions</b>	<b>319</b>
13.1	Love wave	319
13.2	Rayleigh wave	330
<b>14</b>	<b>Green’s Functions</b>	<b>343</b>
14.1	Waves generated by a single force	343
14.2	Waves generated by a couple source	348
14.3	Reciprocity theorems	352
<b>15</b>	<b>Elastic Dislocation Theory</b>	<b>359</b>
15.1	Green’s functions of elastic wave equations	359
15.2	Elastic dislocation theory	362
15.3	Surface wave components of the Green’s functions	371
<b>16</b>	<b>Asymptotic Ray Theory</b>	<b>377</b>
16.1	Sound waves propagating in a continuously varying liquid	377
16.2	WKB approximation	382

16.3	WKBJ solutions for $SH$ waves and $P$ - $SV$ waves	390
16.4	Inversion of dispersion curves of Love waves	392
<b>17</b>	<b>Generalized Ray Theory and Reflectivity Method</b>	<b>397</b>
17.1	Generalized ray theory for an acoustic wave	397
17.2	Generalized ray solutions for $P$ - $SV$ waves	401
17.3	Generalization of reflection and transmission coefficients	405
17.4	Reflectivity method	412
<b>18</b>	<b>Wave Propagation in Spherically Symmetric Spheres</b>	<b>417</b>
18.1	Spherical surface harmonics	417
18.2	Orthogonal vectors	419
18.3	Wave propagation on the surface of a sphere	421
18.4	Asymptotic ray theory	424
<b>19</b>	<b>The Free Oscillations of the Earth</b>	<b>427</b>
19.1	The toroidal oscillations	427
19.2	Spheroidal oscillations	436
19.3	Expansion of a point source	443
<b>20</b>	<b>The Free Oscillations of a Self-Gravitating and Rotating Earth</b>	<b>453</b>
20.1	The spheroidal oscillations of a self-gravitating Earth	453
20.2	Rotational splitting of eigenfrequency	464
	Index	471
