PREFACE	v
PROLOGUE	vii
ACKNOWLEDGEMENTS	ix
1 BIRTH OF OCEAN WAVES	1
1.1 Norbert Wiener and ripples	2
1.2 How are wind waves generated?	4
1.3 What are ripples?	6
1.4 Decay of short waves	8
1.5 Ripples and swell	10
2 GROWTH OF OCEAN WAVES	13
2.1 Young ocean waves	14
2.2 Mature ocean waves	16
2.3 Wave age	18
2.4 Complex structure of ocean waves	20
2.5 Freak waves (rogue waves)	22
3 STORM WAVES IN THE OCEAN	25
3.1 Attack of water wall	26
3.2 Storm waves and whitecaps	28
3.3 The name of breaking waves	30
3.4 Breaking waves under strong wind	32
3.5 Breaking waves in Hokusai's <i>ukiyo</i> e	34

4	DECAY OF OCEAN WAVES	37
4.1	The name of swell	38
4.2	Swell in the Equatorial Pacific Ocean	40
4.3	Squalls in the Equatorial Pacific Ocean	42
4.4	Swell in the Treasure Island by Stevenson	44
5	DEATH OF OCEAN WAVES	47
5.1	Coastal area—the place of waves' death—	48
5.2	Types of wave breaking	50
5.3	Storm waves in a coastal area	52
5.4	Swell and the Scripps Institution of Oceanography	54
5.5	Where dose the wave energy go to?	56
6	CURIOUS, MYSTERIOUS, OR BEAUTIFUL WAVES	59
6.1	Waves of very curious form (1)	60
6.2	Waves of very curious form (2)	62
6.3	Mysterious waves (1)	64
6.4	Mysterious waves (2)	66
6.5	Mysterious waves at the tip of a sandbar	68
6.6	Beautiful pattern of ocean waves	70
6.7	View of ocean waves from the air	72
7	OBSERVATION OF OCEAN WAVES	75
7.1	Wave observations in shallow water	76
7.2	Wave observations in deep water	78
7.3	Cloverleaf buoy	80
7.4	Wave observations in the North Atlantic Ocean	82
7.5	Wave observation; dangerous activities	84

8	LABORATORY SIMULATION OF OCEAN WAVES	87
8.1	Growth of wind waves	88
8.2	Complex structure of wind waves	90
8.3	Breaking waves under strong wind	92
8.4	Breaking waves under very strong wind	94
8.5	Generation of swell	96
8.6	Wave forms of various types of water waves	98
8.7	Instability of water waves	100
